SECTION H - SPECIAL CONTRACT REQUIREMENTS**H.1 PRINTING (EPAAR 1552.208-70) (OCT 2000)***(a) Definitions.*

"Printing" is the process of composition, plate making, presswork, binding and microform; or the end items produced by such processes and equipment. Printing services include newsletter production and periodicals which are prohibited under EPA contracts.

"Composition" applies to the setting of type by hot-metal casting, photo typesetting, or electronic character generating devices for the purpose of producing camera copy, negatives, a plate or image to be used in the production of printing or microform.

"Camera copy" (or "camera-ready copy") is a final document suitable for printing/duplication.

"Desktop Publishing" is a method of composition using computers with the final output or generation of camera copy done by a color inkjet or color laser printer. This is not considered "printing." However, if the output from desktop publishing is being sent to a typesetting device (i.e., Linotronic) with camera copy being produced in either paper or negative format, these services are considered "printing".

"Microform" is any product produced in a miniaturized image format, for mass or general distribution and as a substitute for conventionally printed material. Microform services are classified as printing services and includes microfiche and microfilm. The contractor may make up to two sets of microform files for archival purposes at the end of the contract period of performance.

"Duplication" means the making of copies on photocopy machines employing electrostatic, thermal, or other processes without using an intermediary such as a negative or plate.

"Requirement" means an individual photocopying task. (There may be multiple requirements under a Work Assignment or Delivery Order. Each requirement would be subject to the photocopying limitation of 5,000 copies of one page or 25,000 copies of multiple pages in the aggregate per requirement).

(b) Prohibition.

The contractor shall not engage in, nor subcontract for, any printing in connection with the performance of work under this contract. Duplication of more than 5,000 copies of one page or more than 25,000 copies of multiple pages in the aggregate per requirement constitutes printing. The intent of the limitation is not to allow the duplication of final documents for use by the Agency. In compliance with EPA Order 2200.4a, EPA Publication Review Procedure, the Office of Communications, Education, and Media Relations is responsible for the review of materials generated under a contract published or issued by the Agency under a contract intended for release to the public.

(c) *Affirmative Requirements.*

(1) Unless otherwise directed by the contracting officer, the contractor shall use double-sided copying to produce any progress report, draft report or final report.

(2) Unless otherwise directed by the contracting officer, the contractor shall use recycled paper for reports delivered to the Agency which meet the minimum content standards for paper and paper products as set forth in EPA's Web site for the Comprehensive Procurement Guidelines at: <http://www.epa.gov/cpg/>.

(d) *Permitted Contractor Activities.*

(1) The prohibitions contained in paragraph (b) do not preclude writing, editing, or preparing manuscript copy, or preparing related illustrative material to a final document (camera-ready copy) using desktop publishing.

(2) The contractor may perform a requirement involving the duplication of less than 5,000 copies of only one page, or less than 25,000 copies of multiple pages in the aggregate, using one color (black), so long as such pages do not exceed the maximum image size of 10 $\frac{3}{4}$ by 14 $\frac{1}{4}$ inches, or 11 by 17 paper stock. Duplication services below these thresholds are not considered printing. If performance of the contract will require duplication in excess of these limits, contractors must immediately notify the contracting officer in writing. EPA may then seek a waiver from the Joint Committee on Printing, U. S. Congress. The intent of the limitation is to allow ``incidental'' duplication (drafts, proofs) under a contract. The intent of the limitation is not to allow the duplication of copies of final documents for use by the Agency or as distributed as instructed by the Agency.

(3) The contractor may perform a requirement involving the multi-color duplication of no more than 100 pages in the aggregate using color copier technology, so long as such pages do not exceed the maximum image size of 10 $\frac{3}{4}$ by 14 $\frac{1}{4}$ inches, or 11 by 17 paper stock. Duplication services below these thresholds are not considered printing. If performance of the contract will require duplication in excess of these limits, contractors must immediately notify the contracting officer in writing. EPA may then seek a waiver from the Joint Committee on Printing, U. S. Congress.

(4) The contractor may perform the duplication of no more than a total of 100 diskettes or CD-ROM's. Duplication services below these thresholds are not considered printing. If performance of the contract will require duplication in excess of these limits, contractors must immediately notify the contracting officer in writing. EPA may then seek a waiver from the Joint Committee on Printing, U. S. Congress.

(e) *Violations.*

The contractor may not engage in, nor subcontract for, any printing in connection with the performance of work under the contract. The cost of any printing services in violation of this clause will be disallowed, or not

accepted by the Government.

(f) *Flowdown Provision.*

The contractor shall include in each subcontract which may involve a requirement for any printing/duplicating/copying a provision substantially the same as this clause.

**H.2 ORGANIZATIONAL CONFLICTS OF INTEREST (EPAAR 1552.209-71) (MAY 1994)
ALTERNATE I (MAY 1994)**

(a) The Contractor warrants that, to the best of the Contractor's knowledge and belief, there are no relevant facts or circumstances which could give rise to an organizational conflict of interest, as defined in FAR Subpart 9.5, or that the Contractor has disclosed all such relevant information.

(b) Prior to commencement of any work, the Contractor agrees to notify the Contracting Officer immediately that, to the best of its knowledge and belief, no actual or potential conflict of interest exists or to identify to the Contracting Officer any actual or potential conflict of interest the firm may have. In emergency situations, however, work may begin but notification shall be made within five (5) working days.

(c) The Contractor agrees that if an actual or potential organizational conflict of interest is identified during performance, the Contractor will immediately make a full disclosure in writing to the Contracting Officer. This disclosure shall include a description of actions which the Contractor has taken or proposes to take, after consultation with the Contracting Officer, to avoid, mitigate, or neutralize the actual or potential conflict of interest. The Contractor shall continue performance until notified by the Contracting Officer of any contrary action to be taken.

(d) Remedies - The EPA may terminate this contract for convenience, in whole or in part, if it deems such termination necessary to avoid an organizational conflict of interest. If the Contractor was aware of a potential organizational conflict of interest prior to award or discovered an actual or potential conflict after award and did not disclose it or misrepresented relevant information to the Contracting Officer, the Government may terminate the contract for default, debar the Contractor from Government contracting, or pursue such other remedies as may be permitted by law or this contract.

(e) The Contractor agrees to insert in each subcontract or consultant agreement placed hereunder provisions which shall conform substantially to the language of this clause, including this paragraph, unless otherwise authorized by the Contracting Officer.

H.3 NOTIFICATION OF CONFLICTS OF INTEREST REGARDING PERSONNEL (EPAAR 1552.209-73) (MAY 1994) ALTERNATE I (JUN 1994) DEVIATION

(a) In addition to the requirements of the contract clause entitled "Organizational Conflicts of Interest," the following provisions with regard to employee personnel performing under this contract shall apply until the earlier of the following two dates: the termination date of the affected employee(s) or the expiration date of the contract.

(b) The Contractor agrees to notify immediately the EPA Project Officer and the Contracting Officer of (1) any actual or potential personal conflict of interest with regard to any of its employees working on or having access to information regarding this contract, or (2) any such conflicts concerning subcontractor employees or consultants working on or having access to information regarding this contract, when such conflicts have been reported to the Contractor. A personal conflict of interest is defined as a relationship of an employee, subcontractor employee, or consultant with an entity that may impair the objectivity of the employee, subcontractor employee, or consultant in performing the contract work.

(c) The Contractor agrees to notify each Project Officer and Contracting Officer prior to incurring costs for that employee's work when an employee may have a personal conflict of interest. In the event that the personal conflict of interest does not become known until after performance on the contract begins, the Contractor shall immediately notify the Contracting Officer of the personal conflict of interest. The Contractor shall continue performance of this contract until notified by the Contracting Officer of the appropriate action to be taken.

(d) The Contractor agrees to insert in any subcontract or consultant agreement placed hereunder provisions which shall conform substantially to the language of this clause, including this paragraph (d), unless otherwise authorized by the Contracting Officer.

(c) The contractor shall be granted thirty (30) business days from the date of the contractor's receipt of the Report to review and provide a response to the contracting officer regarding the contents of the Report. The contractor shall:

(1) Review the Report;

(2) Provide a response (if any) to the contracting officer on company letter head or electronically;

(d) The contractor's response to the Report may include written comments, rebuttals (disagreements), or additional information. If the contractor does not respond to the Report within the designated thirty (30) business days, the specified ratings in the Report are deemed appropriate for the evaluation period. In this instance, the contracting officer shall complete the Agency review and sign the Report within three (3) business days after expiration of the specified 30 business days.

(e) If the contractor submits comments, rebuttals (disagreements), or additional information to the contracting officer which contests the ratings, the contracting officer, in consultation with the project officer, shall initially try to resolve the disagreement(s) with the contractor.

(f) If the disagreement(s) is (are) not resolved between the contractor and the contracting officer, the contracting officer shall provide a written recommendation to one level above the contracting officer for resolution as promptly as possible, but no later than five (5) business days after the contracting officer is made aware that the disagreement(s) has (have) not been resolved with the contractor. The individual who is one level above the contracting officer shall:

(1) Review the contracting officer's written recommendation; and

(2) Provide a written determination to the contracting officer for summary ratings (ultimate conclusion for ratings pertaining to the performance period

(g) If the disagreement is resolved, the contracting officer shall complete the Agency review and sign the Report within three (3) business days after consultation.

(h) The contracting officer shall complete the Agency review and sign the Report within three (3) business days after the contracting officer receives a written determination for summary ratings from one level above the contracting officer.

(i) An interim or final Report is considered completed after the contracting officer signs the Report. The contracting officer must provide a copy of completed Reports (interim and final) to the contractor within two (2) business days after completion.

The Contractor agrees to include this clause, including this paragraph (c), and the clause entitled "Treatment of Confidential Business Information" in all subcontracts awarded pursuant to this contract that require the subcontractor to collect information.

H.8 TREATMENT OF CONFIDENTIAL BUSINESS INFORMATION (EPAAR 1552.235-71) (APR 1984)

(a) The Contracting Officer, after a written determination by the appropriate program office, may disclose confidential business information (CBI) to the Contractor necessary to carry out the work required under this contract. The Contractor agrees to use the CBI only under the following conditions:

(1) The Contractor and Contractor's employees shall: (i) use the CBI only for the purposes of carrying out the work required by the contract; (ii) not disclose the information to anyone other than properly cleared EPA employees without the prior written approval of the Assistant General Counsel for Contracts and Information Law; and (iii) return to the Contracting Officer all copies of the information, and any abstracts or excerpts therefrom, upon request by the Contracting Officer, whenever the information is no longer required by the Contractor for the performance of the work required by the contract, or upon completion of the contract.

(2) The Contractor shall obtain a written agreement to honor the above limitations from each of the Contractor's employees who will have access to the information before the employee is allowed access.

(3) The Contractor agrees that these contract conditions concerning the use and disclosure of CBI are included for the benefit of, and shall be enforceable by, both EPA and any affected businesses having a proprietary

interest in the information.

(4) The Contractor shall not use any CBI supplied by EPA or obtained during performance hereunder to compete with any business to which the CBI relates.

(b) The Contractor agrees to obtain the written consent of the CO, after a written determination by the appropriate program office, prior to entering into any subcontract that will involve the disclosure of CBI by the Contractor to the subcontractor. The Contractor agrees to include this clause, including this paragraph (b), in all subcontracts awarded pursuant to this contract that require the furnishing of CBI to the subcontractor.

H.9 RELEASE OF CONTRACTOR CONFIDENTIAL BUSINESS INFORMATION (EPAAR 1552.235-79) (APR 1996)

(a) The Environmental Protection Agency (EPA) may find it necessary to release information submitted by the Contractor either in response to this solicitation or pursuant to the provisions of this contract, to individuals not employed by EPA. Business information that is ordinarily entitled to confidential treatment under existing Agency regulations (40 C.F.R. Part 2) may be included in the information released to these individuals. Accordingly, by submission of this proposal or signature on this contract or other contracts, the Contractor hereby consents to a limited release of its confidential business information (CBI).

(b) Possible circumstances where the Agency may release the Contractor's CBI include, but are not limited to the following:

(1) To other Agency contractors tasked with assisting the Agency in the recovery of Federal funds expended pursuant to the Comprehensive Environmental Response, Compensation, and Liability Act, 42 U.S.C. Sec. 9607, as amended, (CERCLA or Superfund);

(4) To other Agency contractors who, for purposes of performing the work required under the respective contracts, require access to information the Agency obtained under the Clean Air Act (42 U.S.C. 7401 et seq.); the Federal Water Pollution Control Act (33 U.S.C.1251 et seq.); the Safe Drinking Water Act (42 U.S.C. 300f et seq.); the Federal Insecticide, Fungicide and Rodenticide Act (7 U.S.C. 136 et seq.); the Resource Conservation and Recovery Act (42 U.S.C. 6901 et seq.); the Toxic Substances Control Act (15 U.S.C. 2601 et seq.); or the

(c) The Agency recognizes an obligation to protect the contractor from competitive harm that may result from the release of such information to a competitor. (See also the clauses in this document entitled "Screening Business Information for Claims of Confidentiality" and "Treatment of Confidential Business Information.") Except where otherwise provided by law, the Agency will permit the release of CBI under subparagraphs (1), (3), (4), (5), (6), or (9) only pursuant to a confidentiality agreement.

(d) With respect to contractors, 1552.235-71 will be used as the confidentiality agreement. With respect to Potentially Responsible Parties, such confidentiality agreements may permit further disclosure to other entities where necessary to further settlement or litigation of claims under CERCLA. Such entities include, but are not limited to accounting firms and technical experts able to analyze the information, provided that they also agree to be bound by an appropriate confidentiality agreement.

(e) This clause does not authorize the Agency to release the Contractor's CBI to the public pursuant to a request filed under the Freedom of Information Act.

(f) The Contractor agrees to include this clause, including this paragraph (f), in all subcontracts at all levels awarded pursuant to this contract that require the furnishing of confidential business information by the subcontractor.

H.10 GOVERNMENT - CONTRACTOR RELATIONS (EPAAR 1552.237-76) (JUL 1999)

(a) The Government and the Contractor understand and agree that the services to be delivered under this contract by the contractor to the Government are non-personal services and the parties recognize and agree that no employer-employee relationship exists or will exist under the contract between the Government and the Contractor's personnel. It is, therefore, in the best interest of the Government to afford both parties a full understanding of their respective obligations.

(b) Contractor personnel under this contract shall not:

(1) Be placed in a position where they are under the supervision, direction, or evaluation of a Government employee.

(3) Be used in administration or supervision of Government procurement activities.

(C) Employee Relationship:

(1) The services to be performed under this contract do not require the Contractor or his/her personnel to exercise personal judgment and discretion on behalf of the Government. Rather the Contractor's personnel will act and exercise personal judgment and discretion on behalf of the Contractor.

(2) Rules, regulations, directives, and requirements that are issued by the U.S. Environmental Protection Agency under its responsibility for good order, administration, and security are applicable to all personnel who enter the Government installation or who travel on Government transportation. This is not to be construed or interpreted to establish any degree of Government control that is inconsistent with a non-personal services contract.

(d) Inapplicability of Employee Benefits: This contract does not create an employer-employee relationship. Accordingly, entitlements and benefits applicable to such relationships do not apply.

(1) Payments by the Government under this contract are not subject to Federal income tax withholdings.

(2) Payments by the Government under this contract are not subject to the Federal Insurance Contributions Act.

(3) The Contractor is not entitled to unemployment compensation benefits under the Social Security Act, as amended, by virtue of performance of this contract.

(4) The Contractor is not entitled to workman's compensation benefits by

virtue of this contract.

(5) The entire consideration and benefits to the Contractor for performance of this contract is contained in the provisions for payment under this contract.

(e) Notice. It is the Contractor's, as well as, the Government's responsibility to monitor contract activities and notify the Contracting Officer if the Contractor believes that the intent of this clause has been or may be violated.

(1) The Contractor should notify the Contracting Officer in writing promptly, within 30 calendar days from the date of any incident that the Contractor considers to constitute a violation of this clause. The notice should include the date, nature and circumstance of the conduct, the name, function and activity of each Government employee or Contractor official or employee involved or knowledgeable about such conduct, identify any documents or substance of any oral communication involved in the conduct, and the estimate in time by which the Government must respond to this notice to minimize cost, delay or disruption of performance.

(2) The Contracting Officer will promptly, within 30 calendar days after receipt of notice, respond to the notice in writing. In responding, the Contracting Officer will either:

(i) confirm that the conduct is in violation and when necessary direct the mode of further performance,

(ii) countermand any communication regarded as a violation,

(iii) deny that the conduct constitutes a violation and when necessary direct the mode of further performance; or

(iv) in the event the notice is inadequate to make a decision, advise the Contractor what additional information is required, and establish the date by which it should be furnished by the Contractor and the date thereafter by which the Government will respond.

(b) The 20% standard applies to high-speed copier paper, offset paper, forms bond, computer printout paper, carbonless paper, file folders, white woven envelopes, and other uncoated printed and writing paper, such as writing and office paper, book paper, cotton fiber paper, and cover stock. An alternative standard to meeting the 20% postconsumer material standard is 50% recovered

material content of certain industrial by-products.

I.3 NOTICE OF PRICE EVALUATION ADJUSTMENT FOR SMALL DISADVANTAGED BUSINESS CONCERNS (FAR 52.219-23) (MAY 2001)

(a) *Definitions.* As used in this clause--

"Small disadvantaged business concern" means an offeror that represents, as part of its offer, that it is a small business under the size standard applicable to this acquisition; and either--

(1) It has received certification by the Small Business Administration as a small disadvantaged business concern consistent with 13 CFR 124, Subpart B; and

(i) No material change in disadvantaged ownership and control has occurred since its certification;

(ii) Where the concern is owned by one or more disadvantaged individuals, the net worth of each individual upon whom the certification is based does not exceed \$750,000 after taking into account the applicable exclusions set forth at 13 CFR 124.104(c)(2); and

(iii) It is identified, on the date of its representation, as a certified small disadvantaged business concern in the database maintained by the Small Business Administration (PRO-Net).

(2) It has submitted a completed application to the Small Business Administration or a Private Certifier to be certified as a small disadvantaged business concern in accordance with 13 CFR 124, Subpart B, and a decision on that application is pending, and that no material change in disadvantaged ownership and control has occurred since its application was submitted. In this case, in order to receive the benefit of a price evaluation adjustment, an offeror must receive certification as a small disadvantaged business concern by the Small Business Administration prior to contract award; or

STATEMENT OF WORK

STATEMENT OF WORK

Review of Water Quality Models and Research Needs for Total Maximum Daily Load (TMDL) Development

BACKGROUND

All states through the Clean Water Act provision (CWA) [Section 303(d)] are required to develop and implement TMDL for their impaired water bodies and water bodies threatened to become impaired. While considerable improvements have been achieved in reducing the amount of point source pollution from factories and municipalities being discharged into US waters, over 40 percent of the Nation's water bodies remain impaired in that they do not meet water quality standards for their designated use (USEPA 1996). Much of this is attributed to nonpoint or diffuse-source pollution (NPSP). NPSP arises from distributed sources over large areas, such as from agricultural fields and city drainage systems. Water quality parameters of concern include sedimentation, nutrients, pathogens, and toxics (organic and inorganic). The control of such contaminants arising from NPSP is difficult because the source areas can be hard to identify and typical treatment methods are infeasible due to the distributed nature of the pollutants. Developing a TMDL implies establishing a cause-and-effect relationship. This relationship is often complex, and its development involves a consideration of dynamic nature of pollutant characteristics from point and non-point sources, with physical, chemical, and biological, and transport and transformation processes in the receiving surface water bodies. To that end, process-based transport and fate models offer effective alternative to labor intensive and costly monitoring programs for quantifying potential benefits of planned restorations of disturbed watersheds, and for evaluating the efficacy of BMPs. Future research is warranted in improving process-based water quality models in watersheds and receiving water bodies, and in understanding the mechanics of the response of aquatic ecosystems to multiple stressors.

Formulating a comprehensive modeling system with dynamically linked modules, preprocessing of input data, and post processing of output data using user friendly graphical interfaces (GUI) is imperative to resource managers who apply water quality models for decision making. The linkage among different modules provides the capability to predict the effects of land use changes, agricultural practices, and vegetative management/restoration (including wetland/riparian buffer zone creation and restoration) on sediment yield and water quality, and allows for optimal design of BMPs. The responsibility of managing information exchange between the various models in a watershed modeling system, which is the task of experienced computer programmers, needs to be removed from water quality managers and model users. To that end, the needs for linkage capabilities among the various models and across multimedia to formulate integrated watershed modeling systems will be critical to the implementation of TMDL.

SCOPE OF WORK

This contract is to develop a report that summarizes models including those currently available to states that can be used to support Total Maximum Daily Load (TMDL) development and implementation for sediments (clean and contaminated), nutrients, toxic substances, and pathogens, and develop criteria for models selection. The document shall update previous efforts (see suggested references in the appendix) and focus on formulating water quality modeling systems for TMDL analysis, rather than reviewing individual models. The contractor shall provide a suite of process based and/or empirical models, describe their characteristics, and establish evaluation criteria based on which models are selected for TMDL estimation and allocation. The ability of selected models to evaluate the efficacy of alternative structural and nonstructural Best Management Practices (BMPs) should be particularly emphasized in the evaluation process. The main focus of the evaluation, however, shall be on formulating a functional watershed modeling system from individual water quality models across multimedia for TMDL-BMP selection problem (i.e., where and when to put BMP's, etc.). Integrated modeling systems (hydrodynamic, sediment transport, contaminant transport, watershed loading and air-deposition, and ecological) provide the capability to predict the effects of land use changes and evaluate effectiveness of BMPs on flow, sediments budgets, and water quality. The review shall cover models for transport and fate of pollutants such as mercury and nitrogen in the air and across watersheds, including existing efforts to link, among others, sources of mercury and its atmospheric deposition to watershed models. The subsurface/groundwater pathway as an integrated component of the watershed shall also be given attention in the review.

Finally, the contractor shall identify areas for which further research could improve state-of-the-science and state-of-the-art of quality models. The review shall highlight potential drawbacks and gaps in processes modeling (state-of-the-science) of sediments, nutrients, toxics, and pathogens, and identify potential improvements to the current state-of-the-art (preprocessing, post-processing, GUI and models' linkage, incurred level of effort and cost, etc.). The review document in its final form shall assist the user in selecting an appropriate watershed model or formulate a watershed modeling system (i.e., externally linked modules) for TMDL development and cost-based design of BMPs to achieve desired load reductions, and identify models that are currently under development and would be available in the near future.

OBJECTIVES

The objectives are to provide a review document that: (1) evaluates hydrodynamic and water quality models that can be used by states for developing and implementing TMDL for sediments, nutrients, and toxins, and the design of cost-effective BMPs; and (2) identify areas in which further research and development could improve the performance and usability of currently used models.

Task 1 Overview of Water Quality Models

Based on states TMDL program needs, the contractor shall provide an overview of models and modeling systems that can be used in estimating and allocating TMDL for sediment, nutrients (nitrogen, phosphorous, organic carbon), toxics (including mercury), and pathogens in watersheds. The overview shall include, but be not limited to, widely used models (hydrodynamic, hydrologic and water quality) that are listed in the appendix. Previously published efforts and reports related to review and surveys of variety of water quality models are also included in the appendix. The contractor shall develop a classification scheme, group models according to their intended use (refer to the suggested model in the appendix), and provide an overview of background theory and characteristics of the models. The contractor shall also provide an overview of existing watershed modeling systems (i.e., a group of linked models) and propose potentially new modeling systems for management of the above stressors in mixed-landuse watersheds. The report shall document, among others, current state-of-the-science and state-of-the-art in modeling transport and fate of Mercury in watersheds. The contractor shall submit a hard copy of a draft report to the EPA Project Officer for comments within 150 days from contract award. The EPA Project Officer shall return review comments to the contractor within 28 days. After the contractor receives the EPA Project Officer review comments, within 14 days the contractor shall submit the final report as a Microsoft Word document electronically, via diskette along with a hard copy.

Task 2 Model Evaluation

The contractor shall develop evaluation criteria for models identified in Task 1. The evaluation should focus on formulating integrated modeling systems and their suitability for TMDL analysis. The contractor shall deliver a draft outline of model evaluation strategy to the Project Officer for comments within 6 months from contract award. This document shall be an overview not to exceed 10 pages. The contractor shall evaluate the models according to the evaluation criteria and rank their capability to perform a comprehensive TMDL analysis for sediment, nutrients, toxics, and pathogens. The level of effort, training, and the user interface with models should be given particular attention. Those models that formulate a comprehensive modeling system (internally-linked) or lend themselves to external linkages to formulate a comprehensive watershed modeling systems shall be emphasized. The contractor shall document potential obstacles arising from incompatibility between different modules and recommend remedial measures. The contractor shall document two successful TMDL applications (nutrients and mercury) and provide a detailed picture of all models and linkages between the models involved in each case study. The contractor shall deliver a draft document of model evaluation to the Project Officer for comments within 300 days from contract award. The EPA Project Officer shall return review comments to the contractor within 28 days. The information from this task will be included in the second final report.

Task 3 Future Research Needs

The contractor shall explore further research areas related to processes modeling of sediments, nutrients, toxics, and pathogens, and linkage of airborne constituents (mercury, nitrogen, and others) to watershed models and receiving water bodies. The research review shall identify future needs by states to develop and/or improve current practices for modeling TMDL. The review shall also consider research related to improving the state of the technology and the users interface with watershed computer models (e.g., GIS database management, pre- and post-processing, model linkages, and graphical user interfaces). Potential use of systems analysis and optimization-based approaches (e.g., genetic algorithms GA and artificial neural networks ANNS) for evaluation of abatement strategies for TMDL development and cost-effective design of BMPs are suggested research and development topics. The contractor shall deliver a draft document of research needs to the Project Officer for comments within 360 days from contract award. The EPA Project Officer shall return review comments to the contractor within 28 days. After the contractor receives the EPA Project Officer review comments, within 14 days the contractor shall submit the final report. This final report shall include the draft model evaluation from Task 2. This information shall be submitted as a Microsoft Word document electronically, via diskette along with a hard copy.
